

We are vendorized with San Andreas Regional Center for speech therapy services, also we accept Tricare Military insurance. While we do on occasion accept payments from commercial insurance, it is not our standard practice. However, we will provide you with all necessary documents to file your claims and we can even assist in filing the claims, but the payment from the insurance goes directly to you. Please speak to your insurance representative directly regarding your insurance coverage, even if we have already done so for you. We encourage you to speak to your insurance representative in order to avoid any misunderstanding and confusion. When asking about your coverage, you want to ask which diagnostic and procedure codes are covered under speech therapy. Always take detailed notes during all conversations with the insurance company as different representative may give you different information.
